

Ashley Mahan

Director
Technology Transformation Services - Secure Cloud Division
FedRAMP
Federal Acquisition Service
U.S. General Services Administration

Ashley Mahan is the Secure Cloud Portfolio and Federal Risk and Authorization Management Program (FedRAMP) Director within the U.S. General Services Administration (GSA). In this role, she supports agency modernization by providing a standardized approach to cloud security and risk assessment. She is a trusted liaison between federal agencies, industry cloud services providers, and other stakeholder groups advocating for and facilitating the adoption of secure cloud technologies across the federal government.

Prior to serving as FedRAMP Director, Ms. Mahan served as FedRAMP Evangelist, a role in which she led the program's efforts to promote awareness of FedRAMP and secure cloud adoption among Federal Agencies and cloud service providers. During her tenure as Evangelist, the program experienced a significant increase in the number of agency participants and FedRAMP authorized cloud services. She has earned a number of awards for her leadership, subject matter expertise, and dedication to excellence.

Ashley holds an M.S. in Information Technology, B.S. in Business from Virginia Tech, and has a variety of project management and technology industry certifications.
