The automation canvas for everyone

With a common foundation and dedicated activities sets for different coding skills, the Studio family of products offers everyone the ability to build their own robot.

A Citizen Developer can start off the task automation in StudioX, an experienced RPA developer from the Center of Excelency can enhance it in Studio and distribute to the entire company for deployment in UiPath Assistant.

Choose the product that best fits your needs

**StudioX**
For the business users looking to automate tasks for themselves and their immediate teams.

**Studio**
For RPA developers looking to build complex unattended or attended process automations.

**StudioPro**
For specialized developers our most advanced Studio IDE containing testing tools, advanced RPA features and advanced coding services.

Governance made simple

The Studio family of products offers organization level governance. Adjust the level of control to best suite your company setup and your type of users. Allow your employees the freedom to automate in a controlled environment.

Rules can be adjusted to different levels for more experienced Studio users compared to StudioX business users and organizational development standards can be enforced through the Workflow Analyzer.
**Source control**
Directly integrated with Git, TFS, VSTS, and SVN for better collaboration in teams.

**Powerfull debugging**
Ensure quality code through extensive debugging tools and logging.

**Automate any User Interface**
Combine selectors, text, computer vision, and image identification to automate any desktop or web application you work with.

**Command Pallette**
Search across all automation resources (libraries, activities, projects, and open workflows).

**Activities Libraries**
A rich collection of pre-built, drag-and-drop templates, and ready-made RPA and AI components.

**Documentation, tutorials and free classes**
Find out the right learning path for your needs and skills. Our products come complete with documentation, tutorials and demos as well as complete training programs to upgrade your skill level.

**Attended or Unattended? How about both**
Deploy robots at scale throughout your organization. Run locally with UiPath Assistant, manage securely with UiPath Orchestrator.

Thank you for choosing UiPath

To test out any of the Studio versions please navigate to the UiPath website or reach out to one of our sales colleagues.
