Apps.gov to be decommissioned

Important Announcement

As of **December 1, 2012** the apps.gov website will no longer host "SaaS" vendors or other "cloud service" providers, and will be decommissioned.

The IT Schedule Center will no longer evaluate "SaaS" offerings or other "cloud service" offerings proposed specifically for apps.gov. Instead, the IT Schedule 70 contractors will still be able to offer their current "SaaS" offerings or "cloud service" offerings through their respective IT Schedule 70 contract, which will be accessible via www.gsaadvantage.gov.

With the closure of apps.gov, the "SaaS" code process will no longer be valid and current "SaaS" vendors should update their GSA Advantage product catalog with their Contractor Part Number in lieu of their "SaaS" codes.

If you have any questions please contact us:
